Founded in 2010, Saint Systems Sdn Bhd is a company with its core business focused on Information and Communications Technology and Power services. The company was formed by a team of very competent professionals who have a combined experience of 40+ years in the information technology and power fields. Saint Systems is located in Mont Kiara.

The Information Systems team has many long standing customers who are using its managed services and also delivers on smaller ICT development and deployment type projects.

In the years since its formation, the company has had tremendous year on year growth owing to its philosophy on quality of service. The company's motto has always been "Assuring You Our Best Always" and this has been echoed in all projects the company has delivered. Saint System is closely partnered with Bitforge Sdn Bhd which is a Cloud Service Provider (CSP).

DATA CENTER PRESENCE

We have data center presence in multiple locations to cater for different customer requirements. Our primary locations are Exitra Tier-2 and VADS Tier-3 data centers in TTDI. We have another computer room in VSQ at PJ City Centre, Section 14 which is serving customers at that location.

For customers who require PCI DSS certified infrastructure, we can rapidly provision customers at AIMS Tier-3 Jalan Raja Chulan or NTT Tier-4 data center in Cyberjaya. Both are PCI DSS compliant. All of our locations are carrier neutral with POPs by most of the major telcos.

OUR VISION
To be the preferred go to partner for all of your ICT and Power needs.

OUR MISSION
At Saint Systems, we have a mission to be Malaysia's most trusted service partner. We aim to deliver an exceptional level of service with emphasis on innovation and efficiency.

FULL MANAGED SERVICES

This is our most comprehensive service which covers everything from acquisition to design, management, maintenance and active monitoring. We not only become your IT partner but we work with you to be a part of your business.

IT solutions can be complex and overwhelming for the uniniated. Understanding what's required, getting the right mix of servers, applications, and security solutions to maximize performance and minimize risk is often a daunting task. At Saint Systems, our IT experts understand the solutions available to you and the technology to support your specific business needs.

CONSULTANCY

MANAGED NETWORK

Managed Internet services ranging from 1Mbps to 100Mbps depending on your requirements and bandwidth services from the major Telco operators and combine it with our suite of managed services to provide you a worry free Internet experience. Suitable for campus and large enterprise environments with a need for very high speed Internet access and wireless coverage.

Our Managed Security services are designed to minimize your organization's exposure to threats that may compromise the security of your operation and data. Our suite of services will help you identify, assess and manage risks to your infrastructure and applications.

MANAGED SECURITY

CLOUD SERVICES

We offer a comprehensive list of cloud services that includes Virtual Private Servers, Cloud Storage, Software as a Service (SaaS) solutions and web servers.
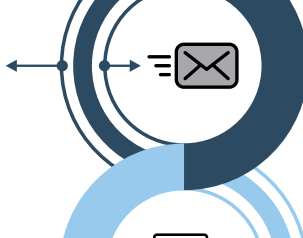

If all you need are a few servers to host a website or application but do not want to worry about the management, then this service is for you. We offer custom solutions that meet your requirements and budget.

DEDICATED SERVERS

HOSTED EXCHANGE ON-PREMISE AND IN THE CLOUD

One of our bestselling services. Forget Gmail as we provide enterprise class Email services for your organization at very competitive prices and with levels of services that exceed other Email providers.

Virtualization solutions from Saint Systems will help your organization to concentrate on hardware resources where they are needed most. This helps your organization to keep up with changing market demands and achieve a more adaptive IT environment.

VIRTUALIZATION

DISASTER RECOVERY

We offer a wide range of solutions for your Business Continuity requirements including onsite and offsite coverage. Our services include a detailed risk assessment study followed by a suitable Disaster Recovery solution to meet the customer's risk mitigation requirements.

Managed licensing services on a subscription basis. Subscription based licensing gives you the agility when it comes to your licensing needs and helps keep your costs down. We also ensure that you remain in compliance.
